2025 SHRM Body of Applied Skills and Knowledge

For more than 70 years, the Society for Human Resource Management (SHRM) has served the human resources (HR) profession. HR professionals worldwide look to SHRM for comprehensive information and tools to help them effectively perform their jobs, develop their careers and transform their organizations. Together with SHRM, these HR professionals create better workplaces where employers and employees thrive together.

In 2011, SHRM began a program of research involving thousands of HR professionals to identify the critical competencies needed for success as an HR professional. This research led to the development of the initial SHRM Competency Model, which defined eight key behavioral competencies (Leadership & Navigation; Ethical Practice; Relationship Management; Communication; Global & Cultural Effectiveness; Business Acumen; Consultation; and Critical Evaluation) and one technical competency (HR Expertise). The SHRM Competency Model represented an important advance for the field of HR by focusing on the types of behaviors that are integral for success in HR.

The SHRM Body of Applied Skills and Knowledge® (SHRM BASK®), formerly the SHRM Body of Competency and Knowledge® (SHRM BoCK®), represents the evolution of the SHRM Competency Model by further defining the knowledge areas in addition to the behavioral competencies. The SHRM BASK was developed through a series of large-scale research studies that incorporated the viewpoints of thousands of HR professionals from around the world. It was most recently updated in 2021, and now includes nine behavioral competencies as well as one technical competency.

In addition to describing the HR field, the SHRM BASK is used to define the content areas of SHRM's certification examinations: the SHRM Certified Professional (SHRM-CP®) exam for HR professionals in operational roles and the SHRM Senior Certified Professional (SHRM-SCP®) exam for senior-level HR professionals in strategic roles. The two SHRM credentials provide reliable indicators to the global business community that the credential-holder is a recognized expert and leader in the HR field with the necessary capabilities in both aspects of HR practice—competencies and knowledge—that are required for effective job performance.

Further, the SHRM BASK is also the common framework for the item writers who develop SHRM-CP and SHRM-SCP exam questions, as well as individuals and organizations developing exam preparation materials. SHRM's own operations for exam development are separate and independent from its operations for study material development. SHRM observes a strict firewall between these activities to protect the integrity and credibility of the certification exams.

What Are Competencies?

A competency is a group of highly interrelated knowledge, skills, abilities and other characteristics (KSAOs) that give rise to the behaviors needed to perform a given job effectively. For example, **Analytical Aptitude**, one of the behavioral competencies in the SHRM Competency Model, describes a group of KSAOs that include knowledge of research design, critical thinking skills and deductive reasoning abilities. These KSAOs enable HR professionals to collect, compile, analyze and interpret job-relevant data and information to support the HR function in their organizations.

A competency model is a set of competencies that collectively defines the requirements for effective performance in a specific job, profession or organization.

Competencies can be either technical or behavioral. Technical competencies reflect the knowledge specific to a given profession that is required for a professional in that field to perform a particular role. The **HR Expertise** competency in the SHRM Competency Model describes the technical knowledge specific to the HR field (such as talent management, recruiting, or compensation and benefits).

Behavioral competencies, on the other hand, describe the KSAOs that facilitate knowledge to job-related behaviors. They are more general in their applicability than the profession-specific technical competency of **HR Expertise**. For example, the behavioral competency **Communication** describes the KSAOs needed to effectively communicate across a range of media (such as e-mail and oral presentations) and with a variety of audiences (including internal and external stakeholders).

In sum, technical competencies reflect **what** knowledge HR professionals apply on the job, and behavioral competencies reflect **how** they apply this knowledge.

Knowledge + Behavior = Success

SHRM's incorporation of behavioral and technical competencies into its competency model and certification exams implicitly recognizes that a strategic mindset leading to HR success is a function of the successful application of both knowledge and behavior. In other words, success stems not only from what you **know** (knowledge) but also **what** you **do** (behavior). Neither is sufficient in isolation.

SHRM's dual approach to understanding HR success is supported by empirical research that was initially gathered in 2011-2012 to develop and validate the SHRM BoCK. A study conducted by SHRM in partnership with several leading multinational employers and universities found that both HR knowledge and behavior are related to HR professionals' job performance. Moreover, it found that both knowledge and behavior are uniquely related to job performance in nonredundant ways. These findings support the key contributions of knowledge and behavior to HR success, the relevance and applicability of the SHRM Competency Model to the HR profession, and the relevance of certification exams that test both behavioral and technical competencies.

Development of the SHRM BASK

SHRM engaged in a systematic and rigorous program of research to develop the SHRM BoCK. SHRM began this program with the development of the SHRM Competency Model in 2011, and it continued its effort through 2021 by conducting a series of activities to further refine the SHRM BoCK as well as validate research in the area of **Inclusion & Diversity (I&D)**. Comprehensive job analysis methods and the active engagement of the global HR community have been used consistently to identify, create and refine competencies that describe the attributes necessary for success as an HR professional.

SHRM initiated the development of the SHRM Competency Model in 2011 when it conducted 111 focus groups with nearly 1,200 HR practitioners, including professionals from 33 countries. Participants in these focus groups represented a diversity of characteristics, both personal (such as career level and tenure) and organizational (such as sector, industry and size). SHRM also conducted a survey of more than 600 chief human resource officers (CHROs) to identify the competencies that HR leaders believe are required for success in the HR profession. Following this extensive data collection, SHRM created a working competency model of eight behavioral competencies and one technical (knowledge-based) competency, which together describe the personal and professional attributes that HR professionals need for success and career advancement. From 2012 to 2014, SHRM conducted a series of studies with HR professionals to confirm the content of the model and its relevance to success in the HR profession.

In 2012, SHRM conducted a survey of more than 32,000 HR professionals worldwide to confirm the importance and generalizability of the SHRM Competency Model. The results of this study support the relevance of the model in describing the personal and professional attributes needed for HR success, as well as its wide applicability. SHRM next conducted (also in 2012) a multiorganizational criterion validation study to measure the link between the competency model and job performance. The study involved a highly diverse sample of more than 800 HR professionals and their supervisors. The results of this study established that proficiency in the SHRM-defined competencies is closely linked to successful job performance.

In 2014, SHRM conducted a knowledge specification exercise to further develop the **HR Expertise** technical competency. First, SHRM performed an extensive review of the existing literature on HR knowledge, including textbooks, curricula, syllabi and other educator resources, to determine the universe of potential areas of knowledge that HR professionals need to perform their jobs. SHRM also consulted its own academic and employer surveys regarding the functional knowledge that HR professionals need to achieve success in the HR field. SHRM drew on this research to create a preliminary knowledge framework for the SHRM-CP and SHRM-SCP exams.

Second, SHRM established in 2014 a SHRM BoCK Advisory Panel of 19 HR and business leaders from various industries, including retail, research, consulting, health care and manufacturing. This panel reviewed the proposed content and framework of the **HR Expertise** competency to ensure its accuracy and comprehensiveness. The panel also defined associated **key concepts** and **proficiency indicators** for each functional area. Upon completion of these studies, SHRM adopted the framework as the basis for the **HR Expertise** technical competency.

DEVELOPMENT OF THE SHRM BASK - CONTINUED

Later, SHRM undertook an extensive refinement of the SHRM BoCK to clarify the competencies and functional areas. This effort was designed primarily to meet the needs of HR professionals studying for the SHRM-CP and SHRM-SCP exams. Because the certification exams have been based on the SHRM BoCK, and now are based on the SHRM BASK, the resulting clarifications also assist HR subject matter experts who write and refine exam items.

SHRM conducted two practice analyses to use as the basis for refining the SHRM BASK. The first practice analysis occurred in 2015-2016, and the second occurred in 2019-2021. The practice analysis process mirrored the process used to initially develop and refine the SHRM Competency Model. During each practice analysis, more than 80 HR professionals, representing the global HR community with participants from North America, Europe, Africa and Asia, engaged in a series of focus groups. Following the extensive review and revision of each component of the SHRM BASK, SHRM then launched a validation study to confirm and further refine its contents, collecting responses from more than 8,000 HR professionals around the world.

SHRM initially concluded its second practice analysis in March 2020, immediately before the occurrence of a series of major world events that had profound effects on workers and the workplace. To reflect those changes, SHRM conducted additional validation research in the area of inclusion and diversity in 2021. SHRM followed the steps in the practice analysis process, including holding focus groups, using a validation survey and revising the SHRM BASK iteratively based on feedback.

As a result of this research, SHRM renamed and changed the functional area of **Diversity, Equity, & Inclusion** to a behavioral competency called **Inclusion & Diversity (I&D)**. The revised area of I&D also includes new content to reflect additional knowledge, skills, abilities and other characteristics that competent HR professionals need to fully support I&D in the workplace. This change also marked a shift in the structure of the SHRM BASK, which now includes nine behavioral competencies and one technical competency that is broken into 14 functional areas.

New Material in the 2025 SHRM BASK

The SHRM BASK is the product of extensive review and research that was conducted from 2019 through 2021. The 2025 SHRM BASK more clearly defines and describes the behavioral and technical knowledge required for HR professionals to meet the current and future needs of employers. The revisions provide additional clarity and guidance to facilitate HR professionals' career development and advancement.

The most significant design enhancement is the transition from a paper-based booklet to an online, interactive resource. This new format allows HR professionals with an Internet connection to access and use the resource from anywhere, makes the resource easier to navigate, and reduces redundant language.

To effectively reflect the current practice of HR, content modifications and enhancements to the 2025 SHRM BASK:

- ▶ Reimagined the behavioral competency called ***Diversity, Equity, & Inclusion*** and evolved it into ***Inclusion & Diversity***
- ▶ Revised the names of two behavioral competencies.
- ▶ Revised the names of two functional areas.
- ▶ Revised and expanded definitions of behavioral competencies and functional areas.
- ▶ Updated, revised and/or expanded sub-competencies, proficiency indicators and key concepts associated with the behavioral competencies.
- ▶ Updated and expanded proficiency indicators and key concepts associated with the functional areas of the ***HR Expertise*** technical competency.
- ▶ Added new examples for key concepts throughout the SHRM BASK to help users better understand and interpret the content, and reorganized the order of key concepts to flow more logically.
- ▶ Refined and expanded the list of glossary terms and resources.

Organization of the SHRM BASK

The HR competencies and knowledge areas that are assessed on the SHRM-CP and SHRM-SCP exams are detailed in the SHRM BASK.

Behavioral Competencies

The nine behavioral competencies, which describe the behaviors and attributes necessary for HR professionals to perform effectively in the workplace and operate with a strategic mindset, are grouped into three clusters:

- ▶ **Leadership**
- ▶ **Interpersonal**
- ▶ **Business**

Behavioral competencies facilitate the application of technical knowledge (i.e., *HR Expertise*), which may be defined as the principles, practices and functions of effective HR management. Successful HR professionals must understand the behavioral components of HR practice in addition to being in command of technical HR knowledge.

For each competency, the following information is provided:

- ▶ A **Definition** of the competency.
- ▶ **Key Concepts** describing the foundational knowledge for the competency.
- ▶ **Sub-competencies** applicable to the competency, with definitions.
- ▶ **Proficiency Indicators** that apply to all HR professionals (i.e., early career through executive career levels) as well as those that apply primarily to advanced HR professionals (i.e., senior and executive career levels).

HR Expertise (HR Knowledge)

The single technical competency, **HR Expertise**, is defined as the principles, practices and functions of effective HR management. It is grouped into three knowledge domains—People, Organization and Workplace—and further divided into 14 HR functional areas that describe the technical knowledge required to perform key HR activities. Its application is facilitated by the nine behavioral competencies.

For each functional area, the following information is provided:

- ▶ A **Definition** of the functional area.
- ▶ **Key Concepts** describing the knowledge specific to the functional area.
- ▶ **Proficiency Indicators** that apply to all HR professionals (i.e., early career through executive career levels) as well as those that apply primarily to advanced HR professionals (i.e., senior and executive career levels).

A Note About Proficiency Indicators

The proficiency indicators define what competent HR behavior and performance look like in practice. For the two sets of proficiency indicators listed for each behavioral competency and functional area, it is important to recognize that the indicators relevant to all HR professionals also apply to advanced HR professionals at the senior and executive levels. For instance, while HR executives may not be specifically proficient in certain functions required of early-career HR professionals, they should nonetheless understand the concepts behind those functions, recognize their strategic importance and be able to mentor junior employees in developing those behaviors. This is particularly important to consider for HR professionals who are studying for the SHRM-SCP exam.

Leadership Cluster

There are three behavioral competencies in the Leadership cluster: **Leadership & Navigation; Ethical Practice; and Inclusion & Diversity**. These competencies describe the behaviors, attributes and underlying knowledge necessary for HR professionals to effectively lead and support an HR team while promoting integrity, accountability, inclusion and the organization's core values.

Key components of Leadership behavioral competencies include: setting and implementing a vision and direction for the HR function; managing or leading organizational initiatives; influencing and supporting other organizational members and leaders; driving an ethical organizational environment; behaving in an ethical manner that promotes high standards of integrity and the organization's values; cultivating and supporting an inclusive and diverse culture that supports organizational performance; and ensuring equity effectiveness.

Leadership & Navigation

Leadership & Navigation is defined as the knowledge, skills, abilities and other characteristics (KSAOs) needed to create a compelling vision and mission for HR that aligns with the strategic direction and culture of the organization, accomplish HR and organizational goals, lead and promote organizational change, navigate the organization, and manage the implementation and execution of HR initiatives.

Sub-competencies:

- ▶ Navigating the Organization
- ▶ Vision
- ▶ Managing HR Initiatives
- ▶ Influence

Key Concepts

- ▶ Leadership theories
 - ▶ Examples include situational leadership; transformational leadership; participative leadership; inclusive leadership; leader-member exchange theory; servant leadership; transactional leadership; trait theory; contingency theory
- ▶ People management techniques
 - ▶ Examples include directing; coaching; supporting; delegating; mentoring
- ▶ Motivation theories
 - ▶ Examples include goal-setting theory; expectancy theory; attribution theory; self-determination theory; equity theory; Herzberg's 2-factor theory
- ▶ Influence and persuasion techniques
 - ▶ Examples include personal appeal; forming coalitions; leading by example; rational persuasion
- ▶ Personal leadership qualities
 - ▶ Examples include vision; self-motivation; self-discipline; risk taking; commitment to continuous learning; growth mindset

SUB-COMPETENCY:

Navigating the Organization

Works within the parameters of the organization's hierarchy, processes, systems and policies.

PROFICIENCY INDICATORS FOR ALL HR PROFESSIONALS

- ▶ Demonstrates an understanding of formal and informal work roles, leader goals and interests, and relationships among employees and executives.
- ▶ Facilitates communication and decision-making necessary to implement initiatives.

- ▶ Promotes buy-in among organizational stakeholders for HR initiatives.
- ▶ Motivates HR staff and other stakeholders to support HR's vision and goals.
- ▶ Serves as an advocate for the organization or employees to advance the organization's strategic direction and goals.
- ▶ Shares opinions about important issues, regardless of risk or discouragement from others.

FOR ADVANCED HR PROFESSIONALS

- ▶ Promotes the role of the HR function in achieving the organization's mission, vision and goals.
- ▶ Builds credibility for the organization regionally, nationally or internationally as an HR expert.
- ▶ Serves as an influential voice for HR strategies, philosophies and initiatives within the organization.
- ▶ Advocates for the implementation of evidence-based HR solutions.
- ▶ Inspires HR staff, non-HR customers and executive-level organizational stakeholders to support and pursue the organization's strategic direction, vision and long-term goals.
- ▶ Builds consensus among leaders about the organization's strategic direction and long-term goals.
- ▶ Uses HR knowledge and skills to influence business strategy.
- ▶ Empowers leaders to create an environment where there is tolerance for risk taking and workers feel comfortable sharing ideas.

Ethical Practice

Ethical Practice is defined as the KSAOs needed to maintain high levels of personal and professional integrity, and to act as an ethical agent who promotes core values, integrity and accountability throughout the organization.

Sub-competencies:

- ▶ Personal Integrity
- ▶ Professional Integrity
- ▶ Ethical Agent

Key Concepts

- ▶ Ethical business principles and practices
 - ▶ Examples include transparency; authenticity; conflicts of interest
- ▶ Privacy principles and policies
 - ▶ Examples include anonymity; confidentiality; opt-in/opt-out policies
- ▶ Internal ethics controls
 - ▶ Examples include protection of employee confidentiality; standards for employee investigations

SUB-COMPETENCY:

Personal Integrity

Demonstrates high levels of integrity in personal relationships and behaviors.

PROFICIENCY INDICATORS FOR ALL HR PROFESSIONALS

- ▶ Shows consistency between stated and enacted values.
- ▶ Acknowledges mistakes and demonstrates accountability for actions.
- ▶ Recognizes explicit and unconscious biases in oneself and others, and takes steps to increase self-awareness.
- ▶ Serves as a role model of personal integrity and high ethical standards.

FOR ADVANCED HR PROFESSIONALS

- ▶ Brings potential conflicts of interest or unethical behaviors to the attention of leaders and executives.
- ▶ Helps others to identify, understand and address their biases.
- ▶ Holds others accountable to their commitments.

SUB-COMPETENCY:

Professional Integrity

Demonstrates high levels of integrity in professional relationships and behaviors.

PROFICIENCY INDICATORS FOR ALL HR PROFESSIONALS

- ▶ Maintains privacy as appropriate and complies with laws and regulations mandating a duty to report unethical behavior.
- ▶ Uses discretion appropriately when communicating sensitive information, and informs stakeholders of the limits of confidentiality and privacy.
- ▶ Maintains current knowledge of ethics laws, standards, legislation and emerging trends that may affect organizational HR practice.
- ▶ Leads HR investigations in a thorough, timely and impartial manner.
- ▶ Establishes oneself as credible and trustworthy.
- ▶ Does not take actions based on personal biases.

- ▶ Partners with people managers to hire new employees from diverse groups across a variety of dimensions.

FOR ADVANCED HR PROFESSIONALS

- ▶ Designs and oversees HR programs, practices and policies that promote an organizational culture that provides access, opportunity and equity for all employees.
- ▶ Plans interventions to resolve identified inequities.
- ▶ Incorporates the results of equity assessments into HR strategy and programs.
- ▶ Identifies, advocates for and oversees benefits and programs that support a diverse and equitable workforce.
- ▶ Seeks out and hires a team of HR professionals that is diverse across a variety of dimensions.
- ▶ Advises business leaders on how to behave in more empathetic and inclusive ways.

SUB-COMPETENCY:

Connecting I&D to Organizational Performance

Demonstrates the importance of I&D efforts to achieving organizational goals and key objectives.

PROFICIENCY INDICATORS FOR ALL HR PROFESSIONALS

- ▶ Demonstrates support to internal and external stakeholders for the organization's I&D efforts.
- ▶ Designs and executes effective I&D initiatives to achieve business goals.
- ▶ Collects, reviews, analyzes and effectively communicates I&D metric results to show measurable effects on organizational objectives and productivity.

FOR ADVANCED HR PROFESSIONALS

- ▶ Creates and advocates for the organizational business case for I&D.
- ▶ Partners with leaders to incorporate I&D goals into the organization's strategic plan.
- ▶ Sets and tracks I&D goals and metrics to measure the effect on organizational objectives and productivity.
- ▶ Incorporates I&D goals and best practices into all HR programs and policies.
- ▶ Identifies changes in the workforce and workplace related to I&D that are necessary to help an organization meet key business objectives.

Interpersonal Cluster

There are three behavioral competencies in the Interpersonal cluster: **Relationship Management, Communication** and **Global Mindset**. These competencies describe the behaviors, attributes and underlying knowledge necessary for HR professionals to perform the collaborative and interpersonal aspects of their jobs.

Key components of Interpersonal behavioral competencies include: networking; building and maintaining professional relationships and teams; successfully managing conflict and negotiations; clearly and effectively communicating with stakeholders; operating within a global workforce; and advocating for a culturally inclusive and diverse workplace.

Relationship Management

Relationship Management is defined as the KSAOs needed to create and maintain a network of professional contacts within and outside of the organization, to build and maintain relationships, to work as an effective member of a team, and to manage conflict while supporting the organization.

Sub-competencies:

- ▶ Networking
